Skills

HTML|Css|Bootstrap|Tailwind Css|JavaScript | React |Node js|Express js| MongoDB |MySQL | Git

Projects

Facebook Application

- This is a fully responsive social media app. We created a fully authentication and authorization system in this application, which includes register and login, email verification, and forgot password functionality.
- I've used cloudinary to upload images.so that the user can update his profile and cover picture, as well as share post images, and everything is saved in cloudinary
- I designed a friendship system that allows users to add friends, cancel requests, accept requests, delete requests, unfriend, follow, and unfollow.
- I also added a live search function where you can search for other users and they will be saved in your search history, which you can always remove.
- **Tech used:**React|Redux|Nodejs|Expressjs|Mongodb

Ecommerce Application

- It is an entirely functional online store. We add authentication for signup and signin.
- I added incrementing and decrementing capabilities, as well as filtering, searching, and sorting, as well as PayPal integration and a rating and review system. I also included live chat with customers so they could communicate directly with the admin.
- I've set up an admin and multiple vendors. Sellers may view orders for a specific seller and perform all CRUD activities with admin authorization. Admin may view the products and perform all CRUD operations.
- **Tech used:**React|Redux|Nodejs|Expressjs|Mongodb

Car Rent Application

- It is a responsive car rental application. I created the signup and signin, filter, and search features.
- I added the required date and driver functions. As a result, the user can rent any car and travel with or without a driver.
- **Tech used:**React|Redux|Nodejs|Expressjs|Mongodb|antd

Point of Sale(POS) Application

- It is a Retail Store POS Application. I've created login, register authentication, and add, edit, and delete functionality.
- We only added the Redux State Management tool for cart functionality.
- I added a generate bill option to this application so that you can also generate a bill with the items and amount for a customer.
- **Tech used:**React|Redux|Nodejs|Expressjs|Mongodb|antd

Education

Dhanalakshmi Srinivasan Engineering College, Perambalur	**2014 - 2018**

- B.E-Mechanical Engineering| CGPA: **6.7**

St.Mary's Higher Secondary School,Pudukkottai	**2013 -2014**

- Class XII |percentage-73.8%

St.Mary's Higher Secondary School,Pudukkottai	**2011 -2012**

- *Class X* |percentage-86%
